

E-Z HAUL CART

THE GARDEN CART

At 5.5 cu ft, the Garden Cart (shown with Flat-Proof wheel) has more capacity than a wheelbarrow, plus the added stability of two wheels and back-saving ergonomic balance. Extra-sturdy construction means this cart will last longer than many standard carts.

THE UTILITY CART

At 8.0 cu ft, the Utility Cart (shown with bike wheels) is great for larger jobs like property maintenance, stall and kennel cleaning, and trips to the beach.

THE JUMBO CART

If you need a big cart, the Jumbo (shown with rib tires) is the perfect choice. It holds 11.5 cu ft of material (up to 600 lbs.) and is perfectly balanced to make big jobs a breeze. Great for farms and ranches.

THE JUMBO "SLIM" CART

We designed the "Slim" for those who needed the large capacity of our Jumbo, but needed a slimmer profile so that it could go through regular 30" doorways. "Slim" also uses swiveling casters so that it can turn on a dime.

THE 3RD WHEEL & PUSH CART

Similar in design to the Jumbo "Slim" Cart, but uses two pneumatic rib front tires for a wider stance. 3rd Wheel has a standard horizontal handle for those needing dump; Push Cart (shown) has upright handle.

THE TRAILER CART

Big jobs require a serious cart and the Trailer Cart is just right. The tub is the same as our Jumbo cart with a capacity of 11.5 cu ft. The hitch will connect to a standard ball for towing behind a lawn tractor, golf cart or ATV. A cotter pin release will dump the tub without having to unhook the hitch. The hitch is removable and includes a stand for use as a hand cart. This cart comes with 8" knobby tires.

| Model | Volume (unheaped) | Weight Rating (lbs.) |
|-----------------------|-------------------|----------------------|
| Garden | 5.5 cu ft | 250 |
| Utility | 8.0 cu ft | 400 |
| Jumbo & Jumbo Slim | 11.5 cu ft | 600 |
| 3rd Wheel & Push Cart | 11.5 cu ft | 600 |
| Trailer | 11.5 cu ft | 600 |
| E-Z Loader | N/A | 250 |

E-Z LOADER

When you need to move heavy objects but need extreme portability, the folding E-Z Loader is the right solution. Pound for pound, this is one strong cart that carries 250 lbs but weighs only 17 lbs.
